Professional Summary

Data-driven technical program manager with 15+ years of experience leading complex operational, sustainability, and enterprise technology initiatives across commercial construction, smart buildings, and SaaS environments. Proven ability to manage cross-functional programs, optimize workflows, analyze operational performance, and drive strategic initiatives across distributed teams.

Currently pursuing an MBA and MSc in Data Science, building hands-on proficiency in Python (pandas, NumPy), machine learning (scikit-learn), data visualization (Tableau, Power BI, Matplotlib), and statistical analysis and experimental design. Combines deep technical domain expertise with strong stakeholder management, systems thinking, and process improvement capabilities.

Recognized for solving complex problems, improving operational efficiency, and translating technical information into actionable business outcomes.

Core Competencies

- Data Analytics & Operational Insights
- Technical Program Management
- Sustainability & ESG Strategy
- Business Process Optimization
- Cross-Functional Leadership
- KPI Development & Performance Tracking
- Workflow & Systems Improvement
- Stakeholder & Client Management
- Risk Analysis & Mitigation
- Agile & Waterfall Methodologies
- Smartsheet, Excel, ClickUp, Salesforce
- Python, SQL & Statistical Analysis
- Machine Learning & Predictive Modeling (scikit-learn)
- Data Visualization (Tableau, Power BI, Matplotlib)
- LEED & Sustainability Programs

Professional Experience

Senior Project Manager | Atrius – Acuity Brands (Remote) | Nov 2023 – Sept 2026

- Lead enterprise-scale technology deployment and operational programs valued at over $10M across commercial and data center environments.
- Manage cross-functional stakeholders, vendors, technical teams, and customer relationships across multiple concurrent projects.
- Develop and monitor project KPIs, forecasting models, schedules, resource allocations, and risk management strategies to improve operational performance and delivery outcomes.
- Drive process optimization initiatives to improve scalability, documentation quality, and operational efficiency across distributed project teams.
- Analyze project performance, dependencies, assumptions, and operational risks to support strategic planning and successful execution.
- Coordinate procurement, budgeting, and resource planning to maintain profitability and align with organizational revenue goals.
- Facilitate communication between technical and business stakeholders to support alignment, transparency, and decision-making.

LEED Project Manager | EcoPreserve (Orlando, FL) | Nov 2022 – Nov 2023

- Managed sustainability and compliance initiatives across multiple commercial projects throughout the United States.
- Led cross-functional collaboration between owners, architects, engineers, and contractors to support strategic sustainability goals and regulatory compliance.
- Analyzed project data related to water usage, materials, indoor air quality, transportation, and environmental performance metrics.
- Developed documentation workflows and reporting systems to improve project coordination and submission accuracy.
- Facilitated recurring stakeholder meetings, tracked project compliance progress, and provided strategic recommendations based on technical analysis and project data.
- Supported organizational sustainability initiatives through research, reporting, and operational coordination.

Program Manager | ACR Engineering (Austin, TX) | Jan 2010 – Nov 2022

- Led large-scale operational and sustainability programs supporting over 80 commercial and institutional projects as part of Austin ISD's $1.5B bond program.
- Managed multidisciplinary technical teams and coordinated project execution across engineering, facilities, sustainability, and construction stakeholders.
- Developed operational processes, reporting structures, tracking systems, and project workflows to improve efficiency and consistency across programs.
- Oversaw project schedules, deliverables, resource planning, and strategic coordination for complex technical initiatives.
- Supported sustainability and building performance initiatives across multiple green building programs and compliance frameworks.
- Trained and mentored new employees on systems, operational processes, project coordination, and technical standards.
- Served as a technical subject matter expert supporting process improvement, issue resolution, and stakeholder communication.

Education

Eastern University

MBA / MSc in Data Science (In Progress)

Relevant Coursework:

- Data Analytics
- SQL & Database Management
- Machine Learning Foundations
- Business Intelligence
- Operations & Supply Chain Management
- Statistical Analysis

University of Mississippi

Bachelor of Science in Engineering

Certifications

- PMP – Project Management Professional
- LEED AP BD+C

Technical Skills

- Excel
- SQL
- Smartsheet
- ClickUp
- Salesforce
- Google Workspace
- Microsoft Project
- Python (pandas, NumPy)
- Tableau & Power BI
- Matplotlib
- Machine Learning (scikit-learn)
- Statistical Analysis & Experimental Design
- KPI Reporting
- Workflow Automation
- Agile Methodologies
- Business Process Analysis

Additional Information

- Strong analytical and systems-thinking mindset
- Experienced leading remote and cross-functional teams
- Excellent communicator with technical and business stakeholders
- Passionate about sustainability, operational strategy, and data-driven decision-making
